# LED INTEGRATION

FENG is a complete LED awning solution that is configurable in three optional variations; LED integrated cassette, LED integrated awning arms or a combination of both.

The integrated LED strips are vividly bright and feature dimming control to create perfect ambience in any environment.

# DAT SYSTEM

The Dynamic Arm Torsion system is specifically designed to prevent fabric damage and sagging by maintaining constant tension. The DAT system utilises an eight-link stainless steel chain to provide the awning with increased strength and durability, ensuring perfect mechanical performance all year round.

## AUTOMATE MOTORISATION

Easily control your motorised Feng with a remote or smart device using the Automate App & Pulse 2 hub. Control awnings from anywhere in the world, set scenes and timers for automatic control and always know what your awnings are doing thanks to ARC bi-directional live feedback. The Pulse 2 also integrates with smart voice-assistants such as Google Assistant, Amazon Alexa and now Apple HomeKit with Siri.
